

FED UP OF WATCHING AND WAITING FOR THE RAIN TO STOP?

Cutting your lawn can be a laborious task at the best of times.

Take this frustration away with the **ISEKI SXG** mower. The blowerless straight chute from the deck to the collector means that even when the grass is wet, you can still cut and collect with the same pristine finish.

See why the SXG Range works so well in the wet on Page 10...

SXG326+

- 21hp diesel engine
- 54" width of cut mower deck
- High or low tip collector up to 600ltr capacity

“Our SXG never misses a beat, with no issues and over 2,500 hours on the clock the quality and reliability of ISEKI cannot be beaten. The quality and value for money of the ISEKI SXG range allowed us to make a very easy purchase decision.”

**Joshua Stebbings,
Truro Independent School**

SXG Mower Range

POWERFUL

Because of the large capacity, low revving 1123cc engine the SXG323+ and SXG326+ creates very little vibration and wear and tear on the engine itself, whilst also being very fuel efficient and powerful at 19hp. The SXG216+ has a powerful 13.5hp, low revving 688cc, 2 cylinder diesel engine ideal for tackling parks and gardens.

COMPACT SIZE

Built to be perfectly balanced, the compact dimensions (2.5-3.3m long) allows the SXG to be incredibly maneuverable, enabling you to effortlessly mow around lawns, flower beds and trees. No extra weights are needed on the front of the machine to keep you safe.

EASY AND COMFORTABLE

Simple to drive, the 2-pedal hydrostatic control allows for the ultimate control so you can quickly change direction and speed whilst mowing with minimal effort. The large operators platform offers maximum comfort with plenty of leg room, ergonomic controls and suspension seat.

HIGHLY ADJUSTABLE DECK

Height of cut on the deck can be changed whilst you are mowing by simple adjusting the dial next to the drivers seat in 8mm increments helping you to easily cut finer lawns and larger longer cut areas all in one go.

Further adjustability can be made by the clevis pin on the castor wheels of the deck.

Model	Width	Height of Cut
SXG216+	40"	30mm-120mm
SXG323+	48"	25mm-115mm
SXG326+	48" or 54"	25mm-115mm

HIGH AND LOW TIP COLLECTOR

To help make disposing of grass cuttings easy the **SXG323+** and **SXG326+** have an hydraulically operated high or low tip collection system which can lift up to a height of 1.97m.

Built to be perfectly balanced, even when the collector is full and tipping from maximum height, there are no additional weights required.

The **SXG216+** comes with a low tip collector operated by the electric, fingertip control, so you don't have to empty the collector manually by tipping it up.

POWERFUL COLLECTION

Using the vents on the top of the decks you can open or shut these to control the airflow from the deck to the collector to allow as much cut grass and debris as possible to be drawn through, this is especially useful in winter when you have a lot of wet heavy grass. In the summer you can close it up to minimise the dust and debris being kicked up when mowing in very dry areas.

(SXG323+ & SXG326+ only)

SXG Mower Range

Making your life easier

SUSPENSION SEAT AND EXTRA LEG ROOM

SIMPLE HEIGHT OF CUT ADJUSTMENT

HYDRAULIC DECK LIFT AND POWER STEERING

GENEROUS 40" TO 54" WIDTH OF CUT

LARGE CAPACITY COLLECTOR

SUPERIOR COLLECTION SYSTEM
